Discharge Planning/Transitions of Care

AND THE SURVEY SAYS

EXECUTIVE SUMMARY

Almost 9 months ago, several collaborating colleagues came together to learn more about the changing landscape of discharge planning/transition planning and the impact the CMS rules had on the entire process. This has been a difficult year for all healthcare providers, and we hope to learn about your challenges and how to use this pandemic learning crisis as an opportunity to update you about the home services industry. For many years, the Home Care Association of America has continued to dig deep on several regulatory concerns, take on tough issues and collaborate to identify the best solutions for the healthcare at home model and how we contribute to this new model.

WE HAVE THREE GOALS

· Create an awareness and leadership opportunity for all of us to become more familiar with each other’s challenges and processes.
· Build a conversation about the home care industry to enhance the discharge/transition process.
· Understand the discharge/transition process and the CMS Conditions of Participation for Discharge Planning, New Rules 2021.

We welcome your participation in the following survey. There are 21 questions, multiple-choice, or comment fields for additional information. The survey takes approximately 5-6 minutes to complete. You may complete the survey anonymously or provide additional information at the conclusion.

The survey is easily accessible through this link: https://www.surveymonkey.com/r/HCAOATransitionPlanning2021CMSA

A copy of the results will be shared with participating individuals.

Thank you in advance,

IL Chapter of the Home Care Association of America
